

## Call, Chat and Collaborate with SolSwitch Connect

Available for Windows, Mac, iOS and Android - SolSwitch Connect allows its users to stay connected to the office using the most common Unified Communications tools. Get connected any time, anywhere and on any device.

Start meetings, chat with co-workers, use your phone like you've never left the office and have face-to-face video chat. SolSwitch Connect is ideal for people who work remotely, are in and out of the office or would prefer to not have a desk phone.

## Mobile and Desktop

SoSwitch Connect was designed to be compatible; no matter your device. That's why we've released a Windows, Mac, iOS and Android edition.

Each license includes usage on up to 4 different devices.

## Full Softphone Capabilities

Make high-quality VoIP calls just like you were using your desk phone. All accounts are provisioned remotely.

End-users simply have to log in with a username and password then start calling and chatting.

## Contact Imports

Bring all of your contacts into SolSwitch Connect from your desktop software or mobile device.

- ✓ LDAP & Active Directory
- ✓ Microsoft Outlook (Windows only)
- ✓ Mac Address Book

Corporate contact directories are managed separately.

## Real-time Live Presence

Your directory will show your contacts' availability with their status and 'click-to-call' functionality.

Quickly see who is online and available, away, offline and/or available for call transfers.

## Instant Messaging

Avoid strings of email chains by quickly and easily communicating with individuals and colleagues using SolSwitch Connect's 1-on-1 instant messaging.

## Group Chats

SolSwitch Connect makes discussing projects and sharing ideas easy. Start a private or public channel based chat room and make everyday work conversations effortless.

## Video Calls

SolSwitch Connect allows you to have face-to-face conversations with your team while out of the office with the HD video call feature.

## Advanced Telephony Features

SolSwitch Connect also supports a long list of call features in order to best handle your customers.

- ✓ Call transfer, forward, hold
- ✓ Click-to-dial and auto-answer
- ✓ SolSwitch feature code integration

## Mobile Push Notifications

Mobile push notifications allow you to receive phone calls even when the app is closed. Avoid the app from having to run in the background, thereby extending your device's battery life.

## Microsoft Outlook Integration

SolSwitch Connect's Outlook integration allows users to see contacts' presence before contacting them.

Quickly and easily see a contact's status, send them an IM, make a phone call or start a video call.

## Headset and Bluetooth Compatible

Bring your own headset! Our app supports a range of USB and Bluetooth devices for Windows and Mac.

Bluetooth headsets can also be used for audio on iOS and Android devices.

## Business SMS

Use SolSwitch Connect to engage your audience and extend your reach by interacting with your customers via text messaging.

Instantly send and receive texts from any of your businesses' telephone numbers.
